Explanation

Environment setup

Create a python virtual environment with `python -m venv venv`.
Upgrade pip using `pip install --upgrade pip`.

Activate the environment with `venv\Scripts\activate.bat` on Windows or `source venv/bin/activate` on Mac or Linux.

Download the dependencies `python -m pip install -r requirements.txt` (Windows) or `pip install -r requirements.txt` (Mac or Linux).

Run the app

To run the app use `python app.py` to start the server. Then open http://127.0.0.1:8050/ in your browser.
To terminate the server press `ctrl-c` (or `cmd-c` on Mac).
